SECTION A – INTRODUCTION AND PURPOSE

State of Missouri

Space Planning Guidelines – Individual Work Space and Functional Support Areas

1. Introduction

Over the past ten years, significant changes have occurred in the office environment. The most important changes are in the technological revolution, work culture (e.g. private offices vs. open plan), staffing trends and occupant expectations. The current space standards for the State of Missouri have not been revised since 1992. The State of Missouri has identified the need to update the Space Planning Guidelines. In beginning this process, other states were interviewed to find out how they are classifying space. Based upon the findings, more and more states are going towards open offices rather than private offices. The revised planning guidelines reflect those discussions and are meant to aid the division and the designer in the support of a functional and effective work environment to accommodate these developments.

2. Purpose

Space Guidelines

The goal of the Space Planning Guidelines is to optimize the utilization of the departmental layout. Work spaces are sized for work performed and for job functions. Open office layouts allow people to work in teams and be near the people with whom they work. By going towards the open plan in the work place, costs are being reduced or eliminated on the teardown and reconstruction. Fast rearrangement of workstations to accommodate organizational changes with a minimum amount of time and expense involved. In addition, large file cabinets should be located outside of cubicles in common file storage areas. Common space and meeting rooms should be used as much as possible to reduce the number of meetings happening in workstations.

SECTION B – JOB CODES AND SPACE ALLOCATION

Note: *1 - Square footage subject to change based on actual building layout.

*2 - Shared workstation.

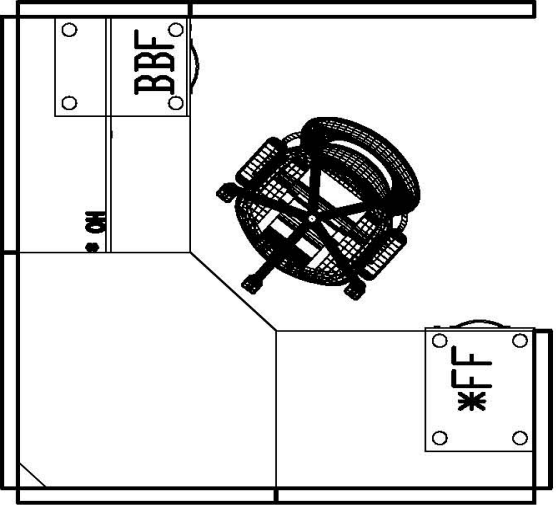

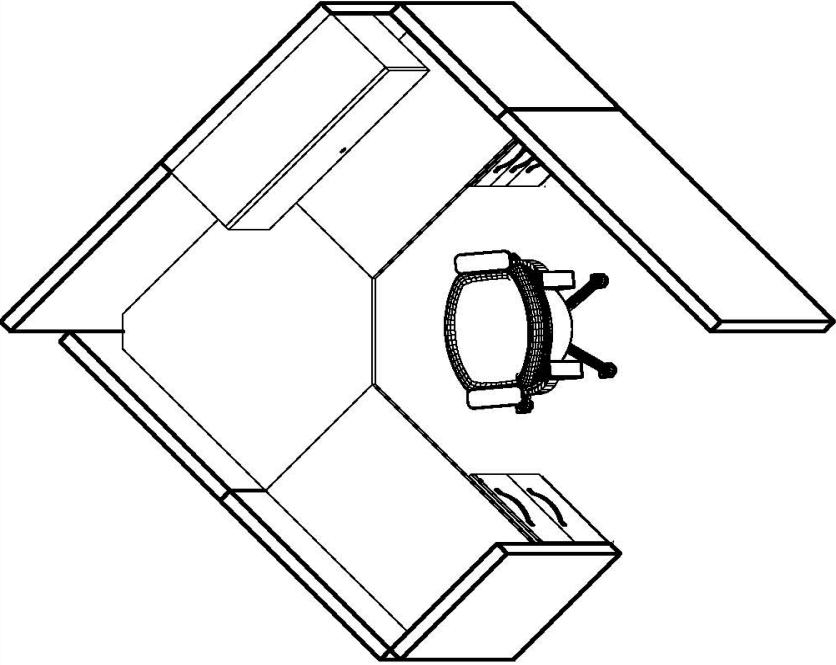

SECTION C. FOOTPRINT GUIDELINES FOR INDIVIDUAL SPACES

Work spaces designed for the task and function of an individual's job has been found to be more efficient. The typical 8' x 8' footprint (64 square feet) is the standard workspace size for the majority of staff functions and offers the greatest flexibility and benefit. Smaller (6' x 6' and 6' x 8') and larger (8' x 12' and 10' x 12') footprints have also been included. The smaller standard may be used for individuals whose task and functions determine the smaller area, such as part-time, telecommuting and data entry functions. The larger footprints may be used for individuals whose task and functions necessitate larger meeting areas or require special consideration for large documents or special equipment within their space.

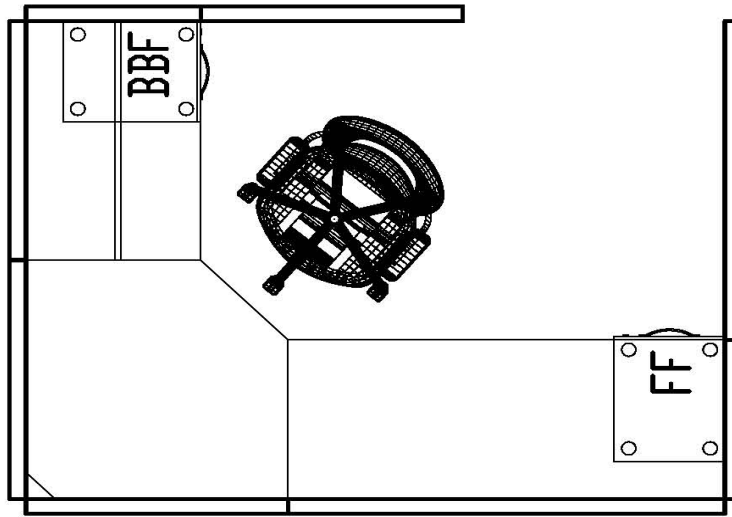

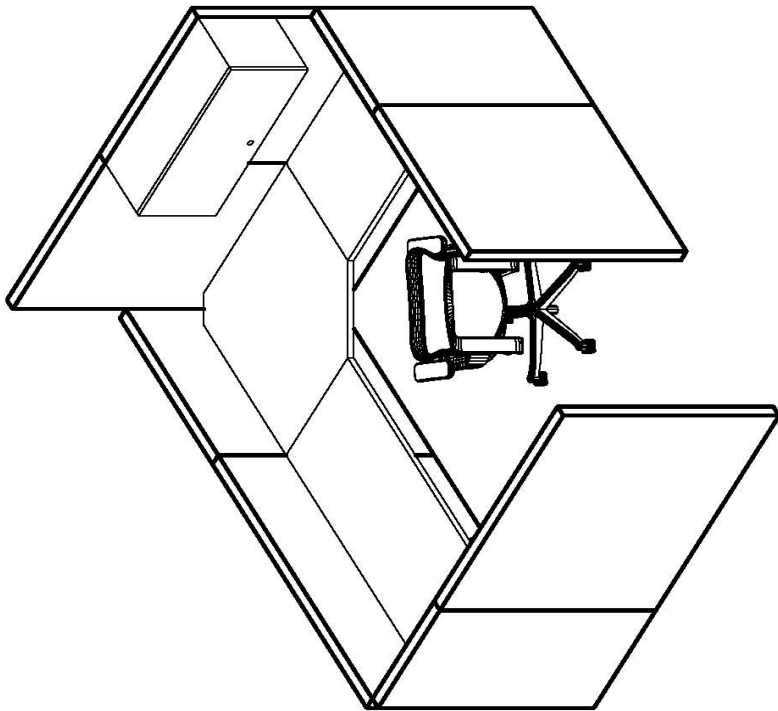

The suggested Work Space Standards are intended as a planning guide for the State of Missouri offices when new office space is needed or when modifying existing space. It should assist state divisions in designing new office layouts. They are *guidelines* and depend on existing conditions. The following standards are a visual reference to illustrate square footages. Details of panel height and componentry will be determined on a case by case basis. The footprint layouts are enclosed in this section.

The following criteria helped determine functional issues for individual footprints: paperwork/task, computer/equipment, work surface use, filing/reference and privacy needs, all measured by high, moderate or low usage. Conferencing was measured by either answering yes with the number of users, or no.

Position titles and job codes, along with grade level are enclosed in **Section B** of this document that defines an acceptable footprint. Refer to <http://www.oa.mo.gov/fmdc/> under the **State Agency Information** section to access the most current Statewide Space Standards Manual reflecting monthly class title modifications.

SECTION D. GUIDELINES FOR FUNCTIONAL SUPPORT AREAS

Space for areas other than individual work areas are listed in this section. Space has been determined both by examining current State of Missouri functional support standards and by using specialized industry standards.

Within this section, the Room Standard Codes that are listed for each space is made up of three categories. For example, with CONF-P-0240, CONF describes the function of the room (Conference); P identifies private (drywall) or O identifies open; and 0240 defines the square feet allocated for the room (240 square feet).

If a functional need is required outside the standard listing, please document the information in the comments section of the Space Analysis in the Functional Support Area details.

 FOR FACILITIES WITH 21 - 50 PEOPLE

TO DETERMINE THE SQUARE FOOTAGE OF BREAKROOMS IN FACILITIES WITH GREATER THAN 50 OCCUPANTS, CALCULATE THE FOLLOWING:
 (TOTAL # OF FTE X 25%) X 20 = SQUARE FOOTAGE OF BREAKROOM
 (ACTUAL SQUARE FOOTAGE MAY VARY BASED ON EXISTING FACILITIES. FINAL SQUARE FOOTAGE TO BE CONFIRMED BY FMDC.)

IF A BUILDING-WIDE CAFETERIA OR BREAKROOM IS AVAILABLE WITHIN A FACILITY, ONLY A COFFEE BAR IS PROVIDED WITHIN DIVISION SPACE.

Functional Support Areas Space Standards

Interview Booth/Room

INTERVIEW-O-0054	Interview Booth - 2 to 3 Person Capacity	54 sq ft
INTERVIEW-P-0080	4 Person Capacity	80 sq ft

Conference Room/Auditorium

Conference/Training Room sizes will be determined using the following data:

To determine total square footage allotment, calculate 85% of total # FTE. This will give you the area allotted for a division. For example, a 100 FTE group, $100 \times 85\% = 85$. Per the chart below, 85 equals 1,200 square feet. It is to the division's discretion to determine the breakdown of this total square footage allocation. This could be one 1,200 square foot conference room or five 240 square foot conference rooms, etc. If 85% of your total FTE is greater than 100 people, calculate the total allotment by the following example: 175 FTE's would equal $175 \times 85\% = 149$ people. The total square footage allotted for 149 people would be 1,200 sq ft plus 480 sq ft = 1,680 square feet. It would then be up to the division to determine the breakdown of conference rooms per the square footage allocation.

Conference Room Area Allotment

120 sq ft	4-6 People
240 sq ft	7-10 People
360 sq ft	11-23 People
480 sq ft	24-50 People
840 sq ft	51-75 People
1,200 sq ft	76-100 People

Written justification is needed for facilities requiring the following spaces:

Conference Room

CONF-P-1665	1,665 sq ft	(Seats 47–84)
CONF-P-3000	3,000 sq ft	(Seats 85–150)

Auditorium

AUD-P-02500	2,500 sq ft	Small (Seats 175–350)
AUD-P-06000	6,000 sq ft	Medium (Seats 351–800)
AUD-P-11500	11,500 sq ft	Large (Seats 801–1,600)

Circulation Factor

Consolidated Facilities shall include the following Circulation Factors in the Calculations:

30% - Total Departmental Circulation (inclusive of Staffing and Functional Support Area Square Footages)

Data/Telecommunications Room

Data/Telecommunication Rooms shall be calculated with the following formula:

Under	5,000 sq ft	64 sq ft
Under	10,000 sq ft	80 sq ft

For every additional 10,000 sq ft, a 100 sq ft data/telecommunications allocation will be provided.

Parking Lot Requirements

Parking is figured with the following formula:

Total #FTE + 25%

The average number of people occupying a facility on a given day is 75% of all FTE. The additional parking provided would account for clients visiting the building. In the event that there is a much larger client load expected, a 40% mark-up would be used in place of 25%. Written justification from the division would be needed before doing such.

Handicapped Parking

Total Parking in Lot	Required Minimum Number of Accessible Spaces
1 to 25	1
26 to 50	2
51 to 75	3
76 to 100	4
101 to 150	5
151 to 200	6
201 to 300	7
301 to 400	8
401 to 500	9
501 to 1,000	2 percent of total
1,001 and over	20, plus 1 for each 100 over 1,000

***One in every eight accessible spaces, but not less than one, shall be served by an access aisle 96" wide and be designated "van accessible".**

Restroom Requirements

Employee Restrooms

	<u># of Each Sex</u>	<u># of Closets</u>	<u># of Lavatories</u>	<u>Square Feet</u>
<u>Female</u>				
RESTROOM-F-0060	1-15	1	1	60
RESTROOM-F-0150	16-40	2	1	150
RESTROOM-F-0180	41-50	3	2	180
RESTROOM-F-0220	51-75	4	2	220
RESTROOM-F-0260	76-100	5	3	260
RESTROOM-F-0300	101-150	6	3	300
<u>Male</u>				
RESTROOM-M-0060	1-40	1	1	60
RESTROOM-M-0150	41-60	2	1	150
RESTROOM-M-0180	61-100	3	2	180
RESTROOM-M-0220	101-150	4	2	220
<u>Unisex</u>				
RESTROOM-U-0060	1-15 (RE: Note #3)	1	1	60

- NOTES:
- The formula to calculate restroom requirements is as follows: Net Gross Sq Ft ÷ 100 = X. Then X ÷ 2 = Y, with Y equaling the number of each sex. For example, a 10,000 sq ft facility = 10,000 ÷ 100 = 100: 100 ÷ 2 = 50. Per the above chart, fifty females equal 3 closets/2 lavatories/180 sq ft and fifty males equal 2 closets/1 lavatory/150 sq ft.
 - Over 150 add one fixture for each additional 80 males and one fixture for each additional 40 females. Lavatories should always to be one-half the number of water closets (round up).
 - Where plumbing fixtures are required, separate facilities shall be provided for each sex, with the exceptions of the following:
 - Separate employee facilities shall not be required in occupancies in which 15 or fewer people are employed.
 - Separate facilities shall not be required in structures or tenant spaces with a total occupant load, including both employees and customers, of 15 or less.

Client Restrooms

	<u># of Closets</u>	<u># of Lavatories</u>	<u>Square Feet</u>
<u>Unisex</u>			
RESTROOM-CU-0060	1	1	60
<u>Female</u>			
RESTROOM-CF-0060	1	1	60
<u>Male</u>			
RESTROOM-CM-0060	1	1	60

NOTE: One unisex client restroom can be provided if total visitor occupancy is less than 15.

E. SAMPLE SPACE ANALYSIS *(Under Development)*

In this section will be a sample Space Analysis, which each division will electronically complete via the FMDC website. This is currently under development. FMDC will send out notification when this portion of the Space Standards is complete.

Until further notice, please request space through the Facility Request Form and the Office and Workstation Requirement Form. Both of these are available on our website <http://www.oa.mo.gov/fmdc/> under the **State Agency Information** section, along with the current Statewide Space Standards Manual. The requesting division should determine the required space through the use of this procedure and the State of Missouri Space Standards shown in this manual. They will prepare a list of the approved personnel who will occupy the space, along with functional support requirements. Any unusual circumstances which go beyond the guidelines must be identified and complete justification provided. The FMDC (Facilities Management and Design and Construction) group of the State of Missouri will then assist divisions in designing the requested office layout.

UNDER DEVELOPMENT

SECTION F – SPACE STANDARD APPEALS PROCESS

The Space Standards contained in this document are intended to provide guidance and uniformity to the space planning process for State of Missouri employees. The Division of Facilities Management, Design and Construction (FDDC) will strive to apply these standards in a fair and equitable manner.

The Director of Planning for FMDC will review and approve all space analysis prior to issuance to the requesting department and ensure that, as closely as possible, such space analyses conform to the Space Standards. Because each space planning issue is unique, disagreements regarding decisions made by FMDC will inevitably be a part of the process from time to time. In recognition of this fact, an appeals process has been established such that, when there is disagreement with the FMDC Director of Planning, agencies may appeal such decisions to the Director of FMDC.

Appeals to the Director of FMDC shall be made in writing by the requesting Department Director or their designated representative. In the event that the appeal is denied by the Director of FMDC, departments may appeal directly to the Commissioner of the Office of Administration. Appeals to the Commissioner shall be made in writing by the requesting Department Director or their designated representative. All decisions regarding appeals by the Commissioner shall be made in writing to the requesting department representative and shall be final.
