

PRODUCT COMPONENT TEMPLATE

DEFINITION

<i>Name</i>	UCC11 CA-11
<i>Description</i>	CA-11 is the Job Restart and Execution Tracking Utility.
<i>Rationale</i>	CA-11 allows JCL jobs to be restarted and tracked by using one JCL statement. This statement allows datasets to be managed, deleted, cataloged, or un-cataloged.
<i>Benefits</i>	When jobs end and need to be restarted, there can be a lot of manual file manipulation that needs to be done to get all of the files in a job to be in sync with each other. CA-11 takes over this file management and does what is necessary to have the datasets synchronized at any point that the restart is issued.
