

COMPLIANCE COMPONENT

Last updated: 11/02/05

DEFINITION																									
<i>Name</i>	State Code Table																								
<i>Description</i>	This document contains the basis for the adoption of a state coding standard for the classification of the geographic unit of 'State' utilizing the Federal Information Processing Standards (FIPS) coding schema.																								
<i>Rationale</i>	Provides a code set for elements describing political boundaries of states that allows for uniformly defined, coded and maintained codes thereby allowing integration and interaction between state systems within Missouri as well as between Missouri and other entities.																								
<i>Benefits</i>	<ul style="list-style-type: none"> Provides a standard for coding state level data within the State of Missouri

<i>Component Sub-type</i>																									
COMPLIANCE DETAIL																									
<i>State the Guideline, Standard or Legislation</i>	<p>Federal Information Processing Standards codes (FIPS codes) are a standardized set of numeric or alphabetic codes issued by the National Institute of Standards and Technology (NIST) to ensure uniform identification of geographic entities through all federal government agencies.</p> <p>This standard provides a set of two-digit numeric codes and a set of two-letter alphabetic codes for representing the 50 states, the District of Columbia and the outlying areas of the United States, and associated areas. The standard covers all land areas under the sovereignty of the United States, the freely associated states of Federated States of Micronesia and Marshall Islands, and the trust territory of Palau. This revision supersedes FIPS PUB 5-1 in its entirety. State agencies shall use the values provided in FIPS coding table. An example of this data is as follows:</p> <table border="1"> <thead> <tr> <th><u>StateFIPSCode</u></th> <th><u>StateCodeText</u></th> <th><u>Description</u></th> </tr> </thead> <tbody> <tr> <td>01</td> <td>AL</td> <td>Alabama</td> </tr> <tr> <td>02</td> <td>AK</td> <td>Alaska</td> </tr> <tr> <td>04</td> <td>AZ</td> <td>Arizona</td> </tr> <tr> <td>to...</td> <td></td> <td></td> </tr> <tr> <td>54</td> <td>WV</td> <td>West Virginia</td> </tr> <tr> <td>55</td> <td>WI</td> <td>Wisconsin</td> </tr> <tr> <td>56</td> <td>WY</td> <td>Wyoming</td> </tr> </tbody> </table>	<u>StateFIPSCode</u>	<u>StateCodeText</u>	<u>Description</u>	01	AL	Alabama	02	AK	Alaska	04	AZ	Arizona	to...			54	WV	West Virginia	55	WI	Wisconsin	56	WY	Wyoming

<input type="checkbox"/> <i>Conditional Use</i>			
Rationale for Component Classification			
<i>Document the Rationale for Component Classification</i>	The State FIPS code component will standardize the manner in which data captured at the state level of geography are captured and stored within the database. This allows for fluent and accurate interchange of common data elements between state agencies.		
Migration Strategy			
<i>Document the Migration Strategy</i>	<p>Missouri State Interagency Migration Strategy Agencies shall adhere to this standard when sharing common data elements.</p> <p>Inter-governmental Migration Strategy Agencies creating new applications should attempt to adhere to the data elements standards when defining the data definitions.</p>		
Impact Position Statement			
<i>Document the Position Statement on Impact</i>			
CURRENT STATUS
