## CAPITAL IMPROVEMENT LONG-RANGE PLAN SUBMISSION

**FISCAL YEARS 2017 THROUGH 2022**

GOVERNOR OF MISSOURI

JEREMIAH W. (JAY) NIXON  
GOVERNOR

JEFFERSON CITY  
65102

P. O. Box 720  
(573) 751-3222

February 9, 2016

Commissioner Douglas E. Nelson  
Office of Administration  
State Capitol, Room 125  
Jefferson City, MO 65101

RE: Capital Improvement Long Range Plan, FY17-22

Dear Commissioner Nelson:

I have received and reviewed the Office of Administration, Division of Facilities Management, Design and Construction's Capital Improvement Long Range Plan for fiscal years 2017 through 2022.

This letter shall serve as documentation of my approval of the plan. I request that you distribute the long-range capital improvement plan on my behalf to the General Assembly in accordance with § 37.010.6, RSMo.

Thank you for your continued efforts and leadership in managing and prioritizing the capital improvement needs for our statewide facilities, which represent a significant asset to this state.

Sincerely,

Jeremiah W. (Jay) Nixon  
Governor

**STATE OF MISSOURI  
CAPITAL IMPROVEMENT LONG-RANGE PLAN SUBMISSION  
INTRODUCTION**

Consistent with RSMo 37.010, Paragraph 6, the Division of Facilities Management, Design and Construction (FMDC) submits the attached Long-Range Capital Improvements Plan.

This plan is divided into three separate sections, depicting:

- ❖ Statewide capital improvement Priority System
- ❖ Vanderziel Facility Advisors (VFA) state-owned facilities by function and age, site and facility analysis
- ❖ Summary information of the long-range plan by department and category. A detailed breakdown, of capital improvement projects for the period covering Fiscal Years 2017 through 2022

Departments have submitted prioritized capital requests to FMDC through the use of the on-line Capital Improvements Budget Request (CIBR) database maintained by FMDC to act as a source for the fiscal years 2017 through 2022 Long-Range Capital Improvements Plan. The departments have estimated that \$168.8 million will be required for FY 2017. The FY 2017 through 2022 long range needs are included and will be continually updated for prioritization, based on the fluctuating needs of the agency or department.

No assumption should be made that projects, other than Governor's Recommendations, in this plan have been or will be appropriated or recommended for appropriation. Also, it should not be construed that a Governor's Recommendation represents a Truly Agreed to and Finally Passed appropriation.

FISCAL YEARS 2017 THROUGH 2022

**STATE OF MISSOURI**  
**CAPITAL IMPROVEMENTS LONG-RANGE PLAN, FY17-22**  
**RELEVANT STATUTES**

- 8.340 The Director of the Division of Design and Construction shall assemble and maintain complete files of information on the repair, utilization, cost and other data for all state facilities, including power plants, pump houses and similar facilities. He shall also assemble and maintain files containing a full legal description of all real estate owned by the state and blueprints of all state facilities.
- 8.360 The Director of the Division of Design and Construction shall inspect all facilities and report to the General Assembly at the commencement of each regular session on their condition, maintenance, repair and utilization.
- 8.315 The Director of Design and Construction shall provide technical assistance to the director of the budget with regard to requests for capital improvement appropriations. The director shall review all capital improvement requests, including those made by the institutions of higher learning, the department of conservation or the highway commission, and shall recommend to the director of the budget and the governor those proposals which should be funded.
- 8.316 The Division of Design and Construction shall promulgate a method to accurately calculate the replacement cost of all buildings owned by public institutions of higher education. The method shall be developed in cooperation with such institutions and shall include the necessary components and factors to accurately calculate a replacement cost. The division shall utilize a procedure to allow differences to be resolved and may include an alternative calculation where the original cost plus an inflation factor is utilized to determine a replacement cost value.
- 37.010 The Commissioner of Administration shall prepare a complete inventory of all real estate, buildings and facilities of state government and an analysis of their utilization. Each year he shall formulate and submit to the governor a long-range plan for the ensuing five years for the repair, construction and rehabilitation of all state properties.

**STATE OF MISSOURI**  
**CAPITAL IMPROVEMENTS LONG-RANGE PLAN, FY17-22**  
**DEFINITIONS OF CAPITAL IMPROVEMENT REQUEST PRIORITIZATION**

The Division of Facilities Management, Design and Construction capital improvement planning managers, after discussion with department capital improvement coordinators and the OA, FMDC liaisons, develop a project severity rating that helps the director of Budget and Planning determine the need for appropriating funds to complete the project. This information is then presented to the Governor and to the Legislature.

**PRIORITY DEFINITIONS:**

- Priority “1”**      **Critical for the preservation of a system, facility or program, and should not be delayed:** Deterioration is accelerating and delay will result in damage to other systems or components, and/or cause obstruction of facility programs. Project cost will increase substantially higher than annual inflation due to increased damage. Corrective construction is necessary to address critical code or regulatory deficiencies, or to meet critical certification requirements. Acquisition or new construction is required to meet the needs of the program.
- Priority “2”**      **Necessary for the preservation of a system, facility or program, but can only be delayed for a short time:** Delay will not immediately result in a substantial impact to the function of the system, facility, or program. Project cost will not be affected beyond annual inflation. Corrective construction is necessary to address non-critical code or regulatory deficiencies, or to meet non-critical certification requirements.
- Priority “3”**      **Desirable for the improvement of a system, facility, or program:** Delay will not influence current operation of the system, facility, or program. Project cost will not be affected beyond annual inflation.
